

Oriental Structural Engineers: Building a Platform for Growth with an SAP-Qualified Rapid- Deployment Solution

Starting as a local contractor in northern India, Oriental Structural Engineers (OSE) has been building landmarks across the country for over 40 years. In order to sustain growth, the company needed to quickly install an IT system that could provide the same solid foundation as one of its roads or bridges. With SAP and implementation partner Highbar Technologies, operations at OSE are running up to 70% faster.

Highbar Technologies Limited

BUSINESS TRANSFORMATION

The company's top objectives

- Reduce errors and employee dependence through automation
- Standardize processes to control costs
- Improve monitoring and control of inventory, purchases, and equipment

The resolution

- Implemented an SAP-qualified rapid-deployment solution for engineering, construction, and operations
- Followed industry templates and best practices
- Went live in three months

The key benefits

- Inventory reductions and improved oversight
- Automated authorizations for requisitions and purchase orders
- Better equipment performance and utilization
- Waste control through online material reconciliation
- Fast and automated reporting for remote projects
- Efficient project monitoring and cost control

TOP BENEFITS ACHIEVED

70%

Faster financial close cycle

50%

Faster procure-to-pay process

99.99%

Faster management information system report preparation (7 days to just seconds)

“With SAP we can better monitor operations and control costs. Those savings carry over to our customers, giving us the edge on contract bids and giving them the OSE quality they know and trust.”

Subodh K Prasad, CIO, Oriental Structural Engineers Pvt. Ltd.
